LIVESTOCK SALT

Pure vacuum salt for needs-based animal nutrition

BIOSAXON

BIOSAXON Livestock Health

BIOSAXON livestock salt offer the right salt for each type of livestock.

Healthy animals are the basic requirement for high-quality milk and meat products as well as for the finest wool. Depending on feedstuff used, animals have a different need for salt, minerals and trace elements, which can be covered perfectly with BIOSAXON products.

All our cattle salt products are labelled with the BIO-certification and are suitable for organic agriculture according to regulations (EG) 2018/848 and (EG) 889/2008.

BIOSAXON Livestock Salt

Pure vacuum salt from Austria for needs-based animal nutrition

BIOSAXON feed salt is used as raw material for premix & compound feedingstuffs. It is of consistently high quality and available in various forms of packaging, perfectly applicable in the animal feed industry as well as directly at the farm.

BIOSAXON cattle salt is easy to dispense in the correct dosages and is the perfect supplement to the feedingstuffs.

BIOSAXON Bergkern rock salt lickstone

Besides the classic cattle salt we offer **BIOSAXON Bergkern rock salt lickstone** as optimal supplement to the regular feed-stuff. Animals take instinctively as much as necessary and according to their individual salt needs. Available in a 25 kg bag with several stones of different size made from 100% rock salt.

Salt and minerals for livestock and wild game

For a successful livestock and healthy development, lickstones should be permanently available to cover the animals' high sodium chloride needs and maintain mineral balance. The minerals are extracted through the licking and can be easily absorbed by the animals.

No matter whether cattle, sheep, goats or wild game pure **BIOSAXON Bergkern rock salt lickstone** meets the salt needs of the respective animal species. The lickstone is particularly weather-resistant and can be fixed well in the forest and outdoors.

AUSTRIAN QUALITY

DIE SALINEN AUSTRIA AG

Salinen Austria AG is one of Europe's leading salt producers. Focusing on speciality salts, the company is carrying a 7,000-year tradition of salt mining in the Salzkammergut region into the future. Its roots can be traced back to the acquisition of ownership rights by Emperor Frederick III in 1449. Salinen Austria was state owned for many years until converting into a joint stock company in 1979 and being fully privatised in 1997.

The company based in Ebensee, at the Traunsee lake in Upper Austria, currently has 470 employees in Austria, with 50 more working in sales offices in southeastern Europe. Production amounts to 1.2 million tons of salt and the export ratio is 55 percent. To ensure this quantity can be managed, Salinen Austria AG has its own warehouses with a total capacity in excess of 300,000 tons for bulk material.

Salinen Austria AG stands for high expertise in the salt area; its products are based on quality, purity, roots and tradition. Products are made from the purest vacuum salt and top quality natural salt from Bad Ischl, Altaussee and Hallstatt in the mountains of the Salzkammergut. Sustainable, environmentally compatible production is our top priority. Production is fully automated at one of the most modern salt extraction plants in Europe. Pure, high quality vacuum salt from Salinen Austria AG is highly versatile and used in a range of product lines. The product range covers everything from table salt and pickling salt for the commercial sector and food industry to high purity pharmaceutical salt for medical

applications, salt tablets for water treatment, livestock salt, industrial salt for chlorine electrolysis and de-icing salt for clearing roads in winter. Potassium sulphate, a product of salt production, is used among other things as fertiliser in organic farming and garden centres.

Stand: 9/2022
