PINK YETI

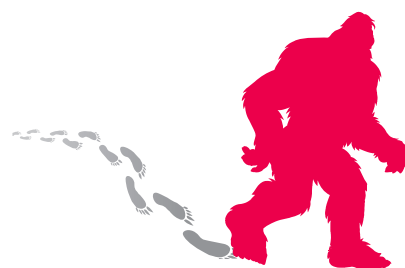

Himalayan Salt

PINK YETI Himalayan salt is the purest rock salt mined in the lower reaches of the Himalayas in the Punjab region of Pakistan.

PINK YETI is 100 % unrefined, natural and non-iodized, free from all environmental pollution and with no additives. This salt of the Himalayas is of best quality and has a wonderful colour and a mild taste. PINK YETI salt is available ground and coarse grained.

The pink colour of this rock salt is due to natural iron content. This salt is not only beautiful to look at but has a lot of applications:

PINK YETI Himalaya pink salt is a high-quality edible salt for cooking and for seasoning on the grill. For additional table seasoning or as a seasoning on finished dishes, we recommend grinding coarse-grained PINK YETI in a ceramic grinder.

THE PINK YETI STORY

Deep in the mountains of Asia, a world dominated by snow and ice, is a creature that erases the dividing line between dream and reality. They say a pink yeti lives there, watchfully guarding a very special treasure: pink salt crystals, which the mountain has kept hidden for millions of years.

Sometimes, or so the tale goes, this benevolent snow spirit shares his treasure with humans. Purest rock salt from the rooftop of the world, with the exquisite taste of pure nature.

PINK YETI Himalaya Salt
