The purest natural evaporated salt for disinfecting swimming pool water

POOLSALZ evaporated salt cleans pool water quickly, efficiently and gently, all without the addition of chemicals. Evaporated salt contributes to the production of chlorine via electrolysis. The salt electrolysis system is continually converting salt into chlorine. This eliminates the need to add chlorine to the pool water. POOLSALZ evaporated salt guarantees clean, crystal-clear swimming pool water and promises pure swimming enjoyment. It is suitable for all pools with salt electrolysis systems.

The benefits of POOLSALZ fine-grade salt:

Pleasant skin sensation
 Salt has an anti-inflammatory, demonstrably positive effect on skin and hair.

99.9% NaCl – no additives
 With its NaCl content of 99.9%, POOLSALZ evaporated salt meets the highest purity grade and is free from release agents and other additives.

Dissolves without residue
 Its high NaCl content ensures that POOLSALZ evaporated salt dissolves quickly and completely without residue.

Sustainable product
 POOLSALZ evaporated salt is 100% natural without additives and is packaged in a film made from at least 45% recycled material.

Austrian quality
 POOLSALZ evaporated salt comes from the World Heritage Region Salzkammergut and is mined and processed with great care.

POOLSALZ evaporated salt is safe and high-quality!
 It fulfils all applicable standards for the purification of pool water:

as well as EN973:2009, Type A; EN14805:2022, Type 1 and EN16370:2022.
