## Salt tablets

Purest vacuum salt for clean and efficient water softening

Saltech complies with EN 973 on softening water for human consumption.

Water contains lime. Daily use of water in trade, industry and households results in lime deposits that can lead to higher energy and maintenance costs and even to actual damage. Water softening systems use ion exchangers to replace calcium and magnesium ions with sodium ions, thus resulting in soft water.

SALTECH offers highest purity and guarantees an optimal, residue-free dissolving process. Soft water saves energy, protecting installations, machines and household appliances in the long term. This reduces operating costs and significantly increases the service life of the systems.

## Industrial salt

For the greatest possible process assurance!

Saltech complies with EN 973 on softening water for human consumption.

Due to its high purity SALTECH salt is an indispensable basic substance used to manufacture a wide range of industrial products. Moreover SALTECH industrial salt & salt tablets is used for water softening. When used in water softeners, an ion exchanger removes calcium and magnesium, exchanging them for sodium ions - soft water is the result.

SALTECH industrial salt offers maximum purity, very good pourability and guarantees constantly high process reliability and an optimal, residue-free dissolving process. Thanks to soft water, energy and maintenance costs can be reduced and actual damage avoided. Machines and household appliances are protected in the long term. This reduces operating costs and significantly extends the service life of the systems.

## SALINEN AUSTRIA AG

Salinen Austria AG is one of Europe's leading salt producers. Focusing on speciality salts, the company is carrying a 7,000-year tradition of salt mining in the Salzkammergut region into the future. Its roots can be traced back to the acquisition of ownership rights by Emperor Frederick III in 1449. Salinen Austria was state owned for many years until converting into a joint stock company in 1979 and being fully privatised in 1997.

The company based in Ebensee, at the Traunsee lake in Upper Austria, currently has 470 employees in Austria, with 50 more working in sales offices in southeastern Europe. Production amounts to 1.2 million tons of salt and the export ratio is 55 percent. To ensure this quantity can be managed, Salinen Austria AG has its own warehouses with a total capacity in excess of 300,000 tons for bulk material.

Salinen Austria AG stands for high expertise in the salt area; its products are based on quality, purity, roots and tradition. Products are made from the purest vacuum salt and top-quality natural salt from Bad Ischl, Altaussee and Hallstatt in the mountains of the Salzkammergut. Sustainable, environmentally compatible production is our top priority. Production is fully automated at one of the most modern salt extraction plants in Europe. Pure, high quality vacuum salt from Salinen Austria AG is highly versatile and used in a range of product lines. The product range covers everything from table salt and pickling salt for the commercial sector and food industry to high purity pharmaceutical salt for medical applications, salt tablets for water treatment, livestock

salt, salt-licks, industrial salt for chlorine electrolysis and de-icing salt for clearing roads in winter. Potassium sulphate, a product of salt production, is used among other things as fertiliser in organic farming and garden centres.
