SOLU K PREMIUM

for Industrial Applications

SOLU K Premium is a pure, natural, highly concentrated, fully soluble potassium sulphate that is being used in following applications:

- ◆ Production of high quality inorganic compounds, potassium persulphate, potassium alum, potassium silicate and purer qualities
- ◆ Accelerator for quick-settling binder, anhydrite screeds, special gypsum and gypsum plasterboards
- ◆ Additive in water-based chloride-free drilling fluids
- ◆ Production of class B / C fire extinguishing powder
- ◆ Production of drawing grease as lubricants for wire drawing
- ◆ Dyestuff / titanium dioxide industry

The high quality and full solubility in water of SOLU K Premium combined with the experience to service most demanding business fields is widely appreciated.

Purity	> 97.5 % K_2SO_4 water soluble potassium sulphate
Bulk density	(1.40 bis 1.60 kg/l)
pH in 5% Solution	7 – 9

SOLU K Premium is a sub product of vacuum salt production from the mountains of Salzkammergut – Bad Ischl, Altaussee and Hallstatt, produced under sustainable and environmental friendly conditions.
